

András Nemes

JUNIOR SOFTWARE DEVELOPER PROFILE

SUMMARY

In the past four and half year, I worked as an IT Manager & Chief Projectionist at a cinema. My main task was to maintain the whole cinema computer and projection system, network and solve any upcoming problem. I loved that job because it was changing and exciting. When the cinema was closed I decided to become a programmer and joined Green Fox. I think I did it right because I love programming better than anything else. I love learning new things and being creative.

STRENGTHS

Based on my team's feedback I am a good team player and also proactive, precise, pragmatic and persistent.

SKILLS TO IMPROVE

I need to improve my self-confidence, and I think this is easily manageable with feedbacks. I usually stuck with one problem instead of move on and come back to the problem later.

LANGUAGES

HUNGARIAN

ENGLISH

MENTOR&PSYCHOLOGIST INSIGHTS

STRONGEST ASSETS

- COOPERATIVE • HONEST
- THOROUGH • FRIENDLY
- CREATIVE

TECH SKILLS

EDUCATION

- 2007**
ECDL EXAM
- 2009**
FORKLIFT OPERATOR COURSE
- 2010**
CNC-PROGRAMMER COURSE
VINCOTTE ACADEMY
- 2011-2012**
CNC-OPERATOR COURSE
NCT ACADEMY (OKJ)

WORK EXPERIENCE

- 2007-2011**
GRANGE HOTELS (LONDON)
CONCIERGE
- 2011-2013**
VERENA '03 KFT.
ADMINISTRATOR
 - Providing administrator tasks
 - Camera systems installation and maintenance
- 2013-2017**
PÓLUS FILM-SZÍNHÁZ KFT.
IT MANAGER & CHIEF PROJECTIONIST
 - System administrator
 - Network building, maintenance and development
 - Video cutting and DCP (Digital Cinema Package) creating
 - Amplification on events
- 2018**
GREEN FOX ACADEMY-HÜLI
JUNIOR SOFTWARE DEVELOPER
 - Working on an Angular (TypeScript based) frontend project

Favorite project

I was very motivated about our frontend project. One of my favorite story was to create a form generator that can generate dynamic forms based on an API response. It had a lot of challenges while I finished it. I had to add fake forms data to our mocked backend and also needed to create new endpoints to manage them. I was very satisfied when I saw the result at the end.

Next thing I want to learn

I want to deepen my Angular knowledge at the beginning. But it doesn't mean that I want to stuck at the frontend. I would like to learn backend as well to become a full-stack developer in the future.

FUTURE

- BACKEND ☒ FRONTEND ☒ DEVOPS ☒ DATA SCIENCE ☐
- FULL-STACK ☒ TEST-AUTOMATISATION ☐ EMBEDDED ☐
- OPEN FOR ANYTHING ☒
